## Summary

Hello! I'm a seasoned Software Engineer with a strong proficiency in PHP, specializing in frameworks such as Symfony and Laravel. My expertise extends to both front-end and back-end development, with a focus on Javascript and Typescript, including popular libraries like React and Nextjs. In the realm of databases, I am well-versed in MySQL, ensuring efficient data management and retrieval.

My toolkit also includes Docker for seamless containerization and orchestration, alongside robust CI/CD practices using Github Actions and Gitlab CI/CD. When it comes to cloud services, I bring valuable experience in AWS, particularly with EC2 for scalable computing, RDS for managed relational databases, and SES for reliable email delivery.

I am dedicated to staying at the forefront of technology, consistently exploring innovative solutions to deliver high-quality software that meets and exceeds expectations. Let's connect and explore the possibilities of collaboration in the dynamic world of software development!

## Experience

### Fullstack Developer

#### IT Company

Apr 2022 - Present (2 years 1 month)

Project: Football CMS and football site

Position: Fullstack Developer

Description: Implement football page allow user to read news, watch livestream of football matches, see league standing, league information, match history.

## Education

**Ton Duc Thang University**

Bachelor's degree, Computer Science

Jun 2016 - Dec 2020

## Licenses & Certifications

**TOEIC 805 - ETS**

Issued 2019 - Expires 2021

**Software Development With Scrum - Axon Active**

12985625328436

**Google Cloud Certification - Google Cloud Training Online**

## Skills

Unit Testing • Computer Science • Continuous Integration and Continuous Delivery (CI/CD) • react • Elasticsearch • TypeScript • Microservice • Golang • Redis • JavaScript

## Honors & Awards

**Top 21 teams in the Zoonhackathon Vietnam 2021**

Nov 2021

Find solution to save wildlife. Use Symfony to create a web app which have a cms so that admin can approve a post contribute by contributor in the community. Proudly that our team is 21st top team in that hackathon.

**1st Place for FinOS challenge in JunctionxHanoi 2021 and audience award**

Dec 2021

Find solution to create a dynamic form using Java ecosystem. Happy to make a right decision as a team leader.

**Software Development With Scrum Course (Axon Active)**

Dec 2019  
Learn Scrum

### **Contributor in Vietnam Symfony Community**

Nov 2021

Contribute to community group Symfony Vietnam.

My responsibilities are:

- Post latest news about Symfony to group
- Write article to guide how to develop web app using Symfony and post it to group and Viblo
- Write a web application Symfony Vietnam so user can go to that web app, learn Symfony and also check their knowledge of that lesson
- Viblo profile: <https://viblo.asia/u/lamkimphu258>

### **Top 5 In HCL's HackerRank Challenge**

Jun 2022

### **Flutter Codelab GDG Cloud Ha Noi**

Dec 2022
